PROFESSIONAL SUMMARY

Aspiring Python Developer with experience in SQL, Django, and REST API development. Skilled in AI assistants, game development, and database management. Passionate about building efficient solutions and continuously learning new technologies.

TECHNICAL SKILLS

- **Programming:** Python, Java
- **Frameworks/Tools:** Flask
- **Databases:** MySQL, SQLite, MongoDB, PostgreSQL
- **Soft Skills:** Communication, Teamwork, Problem-Solving

WORK EXPERIENCE

Backend & Systems Developer | Transactional TCP System

- Architected a three-tier TCP client-server system featuring COMMIT/ROLLBACK logic, timeouts, and custom acknowledgment protocols using Python.

Full-Stack Engineer | AgriMarket E-Commerce

- Built a quick-commerce platform using React, Node.js, and MongoDB.
- Integrated real-time delivery tracking and Razorpay UPI payments.

AI / Robotics Programmer | Autonomous Drone Control

- Developed machine learning pipelines using Python and OpenCV for real-time object detection and autonomous waypoint navigation.

PROJECTS

Autonomous Drone System (AI) | AI & Machine Learning

- An AI-powered drone control application using Python, OpenCV, and machine learning for real-time object detection.

TCP Transaction Engine (Python) | Backend Architecture

- A complex three-tier transactional system featuring COMMIT/ROLLBACK logic built with Python socket programming.

AgriMarket Platform (FullStack) | Full Stack Web Development

- A full-stack e-commerce web application with real-time delivery tracking and UPI integrations.

EDUCATION

Diploma in Computer Science | Kanyapur Polytechnic (Asansol)

2021 – 2024

- Percentage: 66.2%

B-Tech in Computer Science and Engineering | Heritage Institute of Technology (Kolkata)

2024 - 2027

- Percentage:
